DETAILED ACTION

Unless maintained *infra*, all previous rejections are withdrawn.

Scope of Enablement Rejection

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4, 7-11, and 14 were rejected under 35 USC 112, first paragraph because the specification, while being enabled for methods for reducing hair loss in patients receiving 100 mg/kg to 150 mg/kg cyclophosphamide and 0.75 mg/kg methylselenocysteine, wherein the latter is administered orally daily for 21 days with the first dose being given at 14 days before cyclophosphamide treatment, does not reasonably provide enablement for treatment regimes using therapeutic protocols outside those specific parameters. The specification does not enable any person skilled in the art to which it pertains to, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

Applicant argues that the skilled artisan would know that alopecia is a predictable side effect of cyclophosphamide administration. Applicant further submits a declaration

Art Unit: 1612

under 37 CFR § 1.132 as support showing alopecia is a side effect of cyclophosphamide treatment.

Applicant's arguments have been fully considered and have been found persuasive insofar as alopecia being a predictable side effect of cyclophosphamide administration. However, with regards to enablement for reducing alopecia outside specific parameters, Applicant's arguments have not been found persuasive because the ability of selenium to reduce alopecia associated with cyclophosphamide administration is known to be particularly unpredictable as outlined in the prior office action and infra.

Applicant further argues that the Seija reference describes a clinical trial in which patients receiving combination therapy of cisplatin and cyclophosphamide and therefore the reference does not evaluate reducing alopecia caused by cyclophosphamide by using selenium.

Applicant has noted that hair loss is a predictable side effect of cyclophosphamide. Accordingly, a subject being administered cyclophosphamide, as is the case in the Seija reference, would then predictably have the side effect, alopecia. The reference discloses that no influence on hair loss was noted. If selenium had an effect on cyclophosphamide-induced hair loss, then there would at least be some influence on hair loss; in accordance, the selenium influence in reducing alopecia is not enabled outside of certain parameters disclosed in the instant specification.

Applicant submitted declaration (item 4) and the Fakhri reference as support for the claim that undue experimentation would not be required for reducing alopecia

Art Unit: 1612

caused by cyclophosphamide administration by administering selenium containing compounds.

The Fakih reference however, is evaluating selenium containing compounds' protective plasma levels for irinotecan-induced toxicities. The Fakih reference further concluded that no major protection was established.

Indefiniteness Rejection

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4, 7-11, and 14 were rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

This rejection is maintained.

Applicant's explanation has not been found to be persuasive because as the claim is currently recited, it remains unclear whether the therapeutically effective dose is effective for reducing alopecia or effective for treating cancer.

No claims are allowed.

Conclusion

Art Unit: 1612

The following is pertinent art not relied upon for this office action:

- USP 5,262,149

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
